Research and Development Review Board

25X1

16 April 1963 - [] established the RDRB, for the purpose of reviewing and integrating research and development activities, and scientific and technical efforts, in the various Agency components ~~concerned~~ concerned. The Board shall ensure that all ~~scientific~~ scientific and technical activities are constantly related to the broadest interpretation of the Agency's mission, and shall constitute a reviewing body for the Agency's research and development effort as a whole.

When Wheelon became DE/S&T he was also made Chairman to replace the DDCI as Chairman. At meetings of the RDRB from end of 1963 through 1964 the charter of the committee was discussed at almost every meeting with regard to the membership, functions, etc.

Sept 1964 meeting was to discuss charter as reviewed by the DCI. Minutes of that meeting show that it was not discussed.
